## Prospects and comments

BITRA has grown in 2016 at a slightly higher rate than it did in 2015. At this pace, by the end of 2017 BITRA should comprise ca. 71,000 entries, with close to 8,000 of them (over 10%) mined for impact.

More noteworthy figures:

- 1) With 32,126 abstracts, over 47% of BITRA entries (over 66% for the 2001-2016 period) are covered in this very important regard.
- 2) A total of 7,107 documents (10.5% of the records) have been mined for their citations. The resulting +95,000 citations assigned, including 26,002 (38%) entries with at least 1 citation to them detected, make BITRA a powerful tool for bibliometrics in our interdisciplinary.
